<sup>1</sup> Performance statistics for ETF Managed Portfolios are calculated from documented actual investment strategies as set by Forstrong's Investment Committee and applied to its portfolios mandates, and are intended to provide an approximation of composite results for separately managed accounts. Actual performance of individual separate accounts may vary with average gross "composite" performance statistics presented here due to client-specific portfolio differences with respect to size, inflow/outflow history, and inception dates, as well as intra-day market volatilities versus daily closing prices. Performance numbers are net of total ETF expense ratios and custody fees, but before withholding taxes, transaction costs and other investment management and advisor fees. Past investment results provide no indication of future performance. Future returns are dependent on the general investment environment, the nature of the investment mandate and specific portfolio risks. A rate of return for one year or less is not annualized.
